Justin Garter

Cincinnati, Ohio | 513.900.0056 | garterjn@outlook.com | linkedin.com/in/justin-garter | github.com/justin-garter

Builds and secures network infrastructure: architecture, segmentation, system hardening, and automation, fully documented. Focused on infrastructure security in OT and regulated environments.

COMPUTER & TECHNICAL SKILLS

Networking: Physical and logical segmentation, zero trust, ZTNA, ACLs, OT networking, 802.1Q VLANs, VPN, DNS, DHCP
Network & Security Platforms: FortiGate, FortiManager, FortiAP, Cisco Meraki, UniFi, OPNsense, Cloudflare, Tailscale
Cloud & Identity: Microsoft 365 GCC, Azure, Entra ID, Conditional Access, Intune, Windows Hello for Business
Servers & Infrastructure: Windows Server, Proxmox VE, Active Directory, AD CS/PKI, SQL Server, Veeam, Epicor ERP
Linux & Automation: Debian, Bash, systemd, nftables, Ansible, Python, PowerShell, Git; AI-augmented workflows
Security & Compliance: NIST SP 800-171, CMMC Level 2, DFARS, ITAR, MFA, penetration test remediation, SSP/POA&M

EDUCATION

University of Cincinnati, Cincinnati, Ohio **Anticipated Graduation: May 2027**
Master of Science: Information Technology (Accelerated) Graduate Certificate: Data-Driven Cybersecurity
Bachelor of Science: Information Technology | Concentration: Networking/Systems University Honors Program
Bachelor of Science: Cybersecurity GPA: 4.0

PROFESSIONAL WORK EXPERIENCE

System Administrator June 2026 - Present
Maverick Molding Company, Blue Ash, Ohio | Aerospace precision manufacturing, two sites, 200 users

- Implemented Conditional Access requiring phishing-resistant MFA for all users, admin MFA, and geo-blocking
- Took the fleet from unmanaged to fully Intune-managed and rolled out Windows Hello for Business to all users
- Rebuilt production data collection as a hardened event-driven relay with filtering and transformation
- Designed, built, and documented an internal certificate authority, retiring self-signed certificates
- Supported CMMC Level 2 readiness, closing assigned requirements and documenting NIST SP 800-171 gaps
- Owned internal penetration test remediation, verifying closure of every assigned finding before retest

IS Infrastructure Intern September 2025 - December 2025
Shepherd Color Company, West Chester, Ohio | Specialty pigment manufacturing, four sites, 500 users

- Resolved 200+ Tier 1 tickets at 100% satisfaction and wrote self-service guides for common issues
- Replaced Windows 10 laptops during the company-wide Windows 11 hardware refresh
- Assisted the cybersecurity analyst with Cybersecurity Awareness Month presentations at every site and shift

IT Co-op January 2025 - August 2025
Fecon LLC, Lebanon, Ohio | Forestry equipment manufacturing, four sites, 300 users

- Diagrammed the network across four sites and proposed a target architecture from the assessment
- Rebuilt the purchasing requisition approval workflow in Smartsheet, replacing a broken automation
- Built a Power BI dashboard turning survey and customer data into reporting for customer service

TECHNICAL PROJECTS

Fortinet Migration & Zero Trust Segmentation, Maverick Molding **June 2026 - Present**

- Designed segmentation by function and trust level from a gap analysis, then ran procurement through award
- Deploying FortiGate firewalls, FortiManager, and FortiAPs, with ZTNA device posture checks

Home Lab & Self-Hosted Portfolio, justingarter.com **July 2026 - Present**

- Segmented a home lab behind a VLAN-incapable router with OPNsense on Proxmox and default-deny VLANs
- Codified every host in Ansible with an encrypted vault, verified by zero-change reruns against live hosts
- Host justingarter.com in a DMZ VLAN, reachable only through Cloudflare with WAF blocking kept in code
